-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-2,5,8-18,20,22-23,25,30-31,37, and 39 read on Species C figure 7 in the reply filed on 8/30/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Objections

2. Claim 39 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 39 depends on non-elected claim 38.

Claim 39 is assumed to be depending on claim 37.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2,5,8-18,20,22-23,25,30-31,37 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayward (US 4,051,401) in view of Tawse (US 4,297,604).

Regarding claims 1 and 37, Hayward discloses an electric motor comprising: a rotor (2); and a stator; wherein the rotor is supported on a substantially spherical bearing and is of a substantially spherical design facing the stator; and wherein at least segments of the return-path body facing the rotor are of a substantially spherical design facing (teeth 5) the rotor.

Tawse discloses wherein the stator has a magnetic return-path body made of a compressed powder material (col. 16, lines 1-9).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the magnetic return-path body of Hayward by using the compressed powder material as taught by Tawse for the purpose of ease to manufacture.

Regarding claims 2,5,8-18,20,22-23,25,30-31, and 39, it is noted that the proposal in combination of Hayward and Tawse disclose all the limitations as recited.
